This tabulated list of selected technical terms in mechanics of materials is developed by Changwen Mi to facilitate the students in various engineering majors at the Southeast University. This file reflects part of our constant efforts in implementing bilingual teaching of a series of undergraduate and graduate mechanics courses hosted by the Department of Engineering Mechanics at the Southeast University. We had made every effort to ensure the accuracy and completeness of this file for the students' sake. We, however, make no guarantee of the effects of using this file.
