AM14: Bending Internal Forces - Applications

1. Draw the shear and moment diagrams for the compound beam. The three segments are connected by pins  $B$  and  $E$ .

2. Determine the placement distance  $a$  of the roller support so that the largest absolute value of the moment is a minimum. Draw the shear and moment diagrams for this condition.

3. Determine the placement distance  $a$  of the roller support so that the largest absolute value of the moment is a minimum. Draw the shear and moment diagrams for this condition.

4. The truck is to be used to transport the concrete column. If the column has a uniform weight of  $w$  (force/length), determine the equal placement  $a$  of the supports from the ends so that the absolute maximum bending moment in the column is as small as possible. Also, draw the shear and moment diagrams for the column.
